

INSTALLATION OF RIGGING EYEBOLTS ON DECK MOCK-UP

1. Deck Mock-up, for the "H-120" class fireproofed deck structure, complies with the requirements of the FTP Code 2010 and the Rules for the Classification, Construction, and Equipping of Floating Drilling Rigs and Offshore Fixed Platforms.
2. The seams of the insulation should be separated by at least 120 mm.
3. Weld the studs with a special welding device.
4. Secure each layer of insulation with a steel washer, pos. 5.
5. On top of the last layer, lay the mesh pos. 6, then secure with a steel washer.

Specifications

Pos.	Designation	Name	Qty.	Unit	Weight, kg	Comment
		Deck				
1	Rockwool SearFox SL 620	Flame retardant slab 60 · 600 · 1000 density of 100 kg/m ³	14,88	148,25	m ²	
2		Steel stud for securing the insulation L = 160 mm	88	0,88	pieces	
3		Steel stud for securing the insulation L = 170 mm	55	0,66	pieces	
4		Steel stud for securing the insulation L = 280 mm	55	0,83	pieces	
5		Steel spring washer, diameter 38 mm	951	14,5	pieces	
6		Steel mesh 25 · 25 · 0,8	11,8	3,6	m ²	
					Mass	167,04
